SUMMARY

Recently working for a IT company as a senior UI developer. I have a great passion in understanding how users interact with the digital environment, in order to ensure that everything I design and develop is focused on user experience. *I desire to make a difference through my work.*

OBJECTIVE

To get to a position that can fully utilize my skills that I have gathered so far.

CURRENT STAND

In my current company i handle the UI part it is a product company. I like to code in html, and less css and make it very flexible for developers i also handle the javascript part service integration with Ajax including underscoreJs templates.

SKILLS

I am not an expert but always looking out for the best solution for a given problem. A few things that I am familiar with so far, are:

Web Design

- Web Design
- Application Design
- Responsive
- Usability testing
- Unit testing

Software Knowledge

- Adobe Photoshop
- Microsoft Visual studio
- Eclipse, NetBeans
- Sublime text, TextMate

Code, Markup, and Awareness

1. HTML5
2. CSS3, SASS, LESS, CSS animations
3. Bootstrap
4. JavaScript/ECMAScript / (jQuery)
5. JSON/AJAX/XML
6. UnderscoreJs, AngularJs 1
7. Basic nodeJs (Gulp, Grunt).
8. Basic ReactJs
9. GIT server/bitbucket
10. KedoUI
11. Highcharts API

WORK EXPERIENCES (2012 to Till Date)
